

CODE OF ETHICS AND PRACTICE

The association recognizes an obligation through its members to work in harmony with the environment for the benefit of the whole community in the conservation and management of our natural resources.

The spirit and intent of the Code and not the letter of the obligations are paramount and must be the guide for the conduct of members.

Members must consistently strive to improve their knowledge and skill so that the integrity of all members and the Association is recognised and enhanced. To do this it is essential that members must be acknowledged by the community for their:

- Skill and Competency
